Ultra Clear Float Glass

Shop window with the standard clear glass

Shop window with Şişecam Ultra Clear Float Glass

Thanks to higher light transmission and excellent colour rendering, Şişecam Ultra Clear Float Glass is the rational solution to architects and designer's clarity and clear vision demands.

Şişecam Ultra Clear Float Glass, is a low-iron high-quality glass and being used when a high degree of transparency or true colours is required.

Şişecam Ultra Clear Float Glass gives you the feeling that there is no glass.

The greenish tint in standard clear glass is not present when viewed from the edge.

With its higher light transmission and clarity, Şişecam Ultra Clear Float Glass offers unique beauty and performance for

- shop windows,
- museum displays,
- atriums,
- staircases,
- glass doors,
- seperators,
- furniture,
- mirrors,
- baths,
- glass elevators etc.

You could apply additional processes such as edge processing, bending, grinding, tempering, laminating, coating, double glazing, mirroring etc.

Flotal Ultra Clear and Şişecam Ultra Clear Laminated Glass are products for low-iron mirror and low-iron laminated glass respectively.
